QRs/TDs OF 'BREEDING STOCK OF POLICE DOGS'

(I) The QRs for various working line breeds are divided into the following sub-heads for the purpose of convenience for future BOOs detailed for selection of breeding stock :-

1. GENERAL REQUIREMENTS FOR ALL TYPES OF BREEDS OF DOG FOR BREEDING PURPOSES.

a. It should be established that dog both male and female dogs are from proven working lines/purpose bred or its working traits are established through their performance in internationally recognized benchmark dog sport like IPO /IGP/ NVBK /KNPV/ Schutzhund etc.

b. The breeding stock of the dogs for breeds like German Shepherd Dog/Belgian Shepherd Malinois or similar multi-purpose dog breed is required for the dual tasks of detection and patrol and therefore, the requirement of personality and behaviour traits should comprise of affability, confidence, controlled aggression, environment stability, physical and social engagement. Therefore, the screening should focus on all working traits of the police dogs through the use of standardized K9 Behaviour Assessment Test (K9 BAT) tests by employing several measurement methods in a quantifiable manner, to ascertain their working behaviour.

c. Further, the potential dog breeding stock for the Police Service K9s (PSKs) can be procured either locally or from abroad, therefore the general requirements can be further sub-divided into three distinct categories:

2. Procurement of Dog Breeding Stock from established Police/Military Working Dog Centers

a. Since in this case dogs are bred with a purpose similar to own organisational requirement and further are not picked up from open market therefore it is highly unlikely to select a dog entirely unsuitable for the purpose. In such a case even younger dogs can be selected to ensure more residual breedable life from established working lines from these Police/Military Working Dog Centers world over which are maintained over generations purely based on the working dog traits.

b. In this case, their best practices need to be reviewed for the suitability of our purpose for the performance of police duties like detection and patrol duties.

c. In such case male and female dogs can be selected between the age from 18 months to 24 months after parenting one successful litter.

3. Procurement of Dog Breeding Stock from Open Market from abroad

- a. Since in this case best available dogs are required to be selected from open market largely from Europe (being established countries for working dog breeding) therefore detailed safeguards are required to be specified so that no sub-standard or unsuitable dog is supplied to us.
- b. The age of male and female dog is required to be preferably between 24 to 36 months and they should have successfully sired/whelped at least one litter. Health and performance record of the pups sired/whelped by the male/female dog should be provided by the vendor along with option to observe these pups/litter.
- c. Registration with FCI alone should not be acceptable. More significant is that these male and female dogs should have registration with an established working dog club/association/society/organization like IPO/IGP, KNPV/ Schutzhund to their preliminary level or above. Alternatively, evaluation/certification of these dogs by the professional Police/Military Dog Training associations like KNPV or Dog Sports Associations like IPO/ IGP/ Schutzhund/ Mondioringetc are obligatory to safeguard against 'working fitness for the purpose'. These dogs should be holding a valid registration document and duly impregnated with an electronic microchip for unique identification.
- d. Estrous record of the female dogs should be provided by the vendor to ascertain breeding soundness and genetic suitability.
- e. The vendor must provide certificate for breeding soundness from registered veterinary practitioner specialized in veterinary gynaecology duly supported by positive semen examination report in case of male dogs and by genital tract ultrasonography in case of female dog.

4. Procurement of Dog Breeding Stock from Open Market within India

- a. Since it is clear that generally dogs bred in India are bred for 'show requirements' and not for 'working line traits', the BOO has to be extra cautious in selection of the breeding stock.
- b. Only those breeders who can prove that they have bred dogs for working line traits will be considered.

5. Additional General requirements for all types of Breeds of Dog for Breeding Purposes.

- a. The pedigree of previous three generations should be provided by vendor for the male and female dogs and buying agency should compare and analyse with already held breeding stock to ensure that dogs are not in-bred in any way.
- b. The male and female dogs should be free from genetic diseases which comprises of hip dysplasia, elbow dysplasia, hereditary epilepsy and progressive retinal atrophy etc. The vendor should guarantee for minimum 12 months regarding any of the above mentioned genetic disorders and replace the dog with similar specifications in the event of any of these genetic abnormalities surfaces during this period. This replacement should be free of cost except transportation cost which is chargeable based on actual expenditure.
- c. The male and female dogs should be duly immunised against common canine infectious diseases and apparently free from infectious & contagious diseases which comprises of Canine Parvo, Distemper, Hepatitis, Leptospirosis, Corona, Para-influenza and Rabies.
- d. The male and female dogs should be free from any genital diseases like metritis, ovarian/uterine cysts, mastitis, vaginitis, pyometra in case of female dog and cryptorchidism, inflammation of testes, phimosis, paraphimosis, priapism in case of male dog. These dogs should also be free from any skin disorder like dermatitis, folliculitis, seborrhea, scabies, sarcoptic&demodectic mange, fleas, ticks infestation, tumour, granulomas, anal sac disease or any other fungal/bacterial infections.
- e. The clinical and laboratory examination of the candidate dogs should be carried by the vendor within previous 10 days from the date of examination from an ISO 17025 accredited veterinary laboratory with regards to complete blood count (CBC), biochemistry profile with regards to liver and kidney function tests, lipid profile and heart worm test.
- f. Complete radiological examination for hip and elbow scores, chest radiographs and any other record to ensure that the dogs have not undergone any surgical intervention.
- g. The dogs must comply with all mandatory quarantine norms of both exporting and importing countries.

(II) Trial Directives (TDs)

As a general principle, the following will be considered while conducting the test for the Trial Directives.

1. The evaluation of the specifications against above mentioned QRs would be carried by the board of officers convened by the competent authority comprising by qualified officers with adequate experience. The board must comprise of minimum two qualified veterinary officer to undertake physical and clinical examinations against the QRs.

2. The board of officers would verify documents, records as required against each QRs. The board would also physically examine and verify that criteria against each QR is complied with.

3. Further, the board would carry out K9 Behaviour Assessment (K9 BAT) as issued by the Ministry of Home Affairs to ascertain the suitability of male and female dogs for the dual purpose of detection and patrol in case of multi-tasking breeds like GSD/BSM etc or for the purpose of detection in case of single purpose breeds like Labrador, Cocker Spaniels, Springer Spaniels, Blood Hound etc. The dogs must qualify in K9 BAT as per acceptance criteria.

(III) BREED-WISE QRS AND TDS

01. WORKING LINE LABRADOR RETRIEVER-

QR	TD
a. General appearance-: Strongly built, Medium sized, short coupled and well balanced conformation.	a. It will be ascertained by BOO during visual inspection.
b. Distinguishing characters-: Otter tail, Short dense, weather resistant coat, clear cut head with broad back skull and moderate stop.	b. The otter tail to be confirmed by BOO and ascertained that tail is very thick at the base, gradually tapering toward the tip, of medium length and extending no longer than to the hock. The tail should be free from feathering and clothed thickly all around with the Labrador's short, dense coat, thus having that peculiar rounded appearance that has been described as the "otter" tail.
c. Height, Weight and Colour-: (i) Height- Male- 21-25 Inches Female- 20-24 Inches	c. (i) Height will be measured by inch tape from ground to ridge of pectoral girdles (withers). Any variance of half inch positive or negative is acceptable however any variance above one inch is not acceptable.

<p>(ii) Weight- Male- 25-36 kg Female- 23-36 kg</p> <p>(iii) Colour- Black, Yellow & Chocolate</p>	<p>(ii) BOO will ascertain weight of Dog on weighing machine.</p> <p>(iii)BOO will confirm the colour during visual inspection.</p>
<p>d. Age- Maximum up to 02 yrs</p>	<p>d. BOO will check the birth certificate, dentation of animal and other age mile-stones.</p>
<p>e. Working traits-</p> <p>(i) Outgoing, tractable nature, intelligent and adaptable, non aggressive towards humans and other animals and non shy.</p> <p>(ii) Dogs from open source must be at least IGP level I (Schutzhund) qualified.</p> <p>(iii) If the Dog is from uniform forces of foreign friendly countries then they should be at least 90 % or above in K9 assessment test.</p> <p>(iv) The male should have fathered at least one good quality litter and the female must have whelped high quality pups at least once.</p>	<p>(i) Behavioural traits will be ascertained by BOO during interaction with animal.</p> <p>(ii)BOO will check IPO /IGP/ NVBK /KNPV/ Schutzhund certification etc.</p> <p>(iii) BOO will ascertain certification.</p> <p>(iv) BOO will check breeding record of the dog and also see the quality of pups born.</p>
<p>f. Faults-Any deviation from these specifications is a fault. In determining whether a fault is minor, serious, or major, these two factors should be used as a guide: (a) The extent to which it deviates from the standard (b) The extent to which such deviation would actually affect the working ability and welfare of the dog.</p>	<p>f. BOO will examine the dog Visually, Physically, Medically and other documentary evidences/Medical records to ascertain there is no fault.</p>
<p>g. Veterinary Examination- The dog should be Veterinarily sound.</p>	<p>g. Tech officer of BOO will ascertain soundness.</p>

02. WORKING LINE GERMAN SHEPHERD-

QR	TD
<p>a. General appearance-: Should be strong, agile, well muscled animal, alert and full of life. The dog is longer than tall, deep bodied and presents an outline of smooth curves rather than angles.</p>	<p>a. It will be ascertained by BOO during visual inspection.</p>
<p>b. Distinguishing characters-: Eyes of medium size, almond shaped, set a little obliquely and not protruding. Ears are moderately pointed, in proportion to the skull, open toward the front, and carried erect when at attention. Skull slopes in to the long, wedge shaped muzzle without abrupt stop. The withers are higher and sloping into the level back. The back is straight, very strongly developed without sag or roach and relatively short. Tail bushy, with the last vertebra extended at least to the hock joint. It is set smoothly into the croup and low rather than high. At rest, the tail hangs in a slight curve like a sabre.</p>	<p>b. BOO will confirm it during visual inspection.</p>
<p>c. Height, Weight and Colour-</p> <p>(i) Height- Male- 23-26 Inches Female- 22-24 Inches</p> <p>(ii) Weight- Male& Female- 23-30 kg</p> <p>(iii) Colour- Dark, Tan, Grey and all black.</p>	<p>(i) Height will be measured by inch tape from ground to ridge of pectoral girdles (wither). Any variance of half inch positive or negative is acceptable however any variance above one inch is not acceptable.</p> <p>(ii) BOO will ascertain weight of Dog on weighing machine.</p> <p>(iii) BOO will confirm the colour during visual inspection.</p>
<p>d. Age- Maximum up to 02 yrs</p>	<p>d. BOO will check the birth certificate, dentation of animal and other age milestones.</p>

<p>e. Working traits-</p> <p>(i) Outgoing, tractable nature, intelligent and adaptable, non aggressive towards humans and other animals and non shy.</p> <p>(ii) Dogs from open source must be at least IGP level I (Schutzhund) qualified.</p> <p>(iii) If the Dog is from uniform forces of foreign friendly country then they should be at least 90% or above in K9 assessment test.</p> <p>(iv) The male should have fathered at least one good quality litter and the female must have whelped high quality pups at least once.</p>	<p>(i) Behavioural traits will be ascertained by BOO during interaction with animal.</p> <p>(ii) BOO will check IPO /IGP/ NVBK /KNPV/ Schutzhund certification etc.</p> <p>(iii) BOO will ascertain certification.</p> <p>(iv) BOO will check breeding record of the dog and also see the quality of pups born.</p>
<p>f. Faults-Any deviation from these specifications is a fault. In determining whether a fault is minor, serious, or major, these two factors should be used as a guide: (a) The extent to which it deviates from the standard (b) The extent to which such deviation would actually affect the working ability and welfare of the dog.</p>	<p>f. BOO will examine the dog Visually, Physically, Medically and other documentary evidence/Medical records to ascertain there is no fault.</p>
<p>g. Veterinary Examination- The dog should be Veterinarily sound.</p>	<p>g. Tech officer of BOO will ascertain soundness.</p>

03. WORKING LINE BELGIAN SHEPHERD-

QR	TD
<p>a. General appearance- Well balanced dog, stands squarely on all fours and viewed from the side, the top line, four legs and hind legs closely approximate a square.</p>	<p>a. It will be ascertained by BOO during visual inspection.</p>
<p>b. Distinguishing characters- The head is clean cut and strong without heaviness, overall size in proportion to the body. It shows alertness, attention and readiness for activity and gaze is intelligent and questioning. Eyes are brown, preferably dark brown, medium size, slightly almond shaped, not protruding. Eye rims are black. The ears approach the shape of an equilateral triangle and are stiff, erect, and in proportion to the head in size. The outer corner of the ear should not come below the center of the eye. The top of the skull is flattened rather than</p>	<p>b. BOO will confirm it during visual inspection.</p>

<p>rounded with the width approximately the same as the length but no wider. The stop is moderate. The muzzle is moderately pointed, avoiding any tendency to snippiness, and approximately equal in length to the top skull. The basic coloring is a rich fawn to mahogany, with black tips on the hairs giving an overlay appearance. The mask and ears are black. The coat should be comparatively short, straight, hard enough to be weather resistant, with dense undercoat</p>	
<p>c. Height, Weight and Colour:-</p> <p>(i) Height- Male- 23-26 Inches Female- 21-24 Inches</p> <p>(ii) Weight- Male & Female- 23-35 kg</p> <p>(iii) Colour- Rich fawn to mahogany, with black tips on the hairs giving an overlay appearance. The mask and ears are black</p>	<p>(i) Height will be measured by inch tape from ground to ridge of pectoral girdles (wither). Any variance of half inch positive or negative is acceptable however any variance above one inch is not acceptable.</p> <p>(ii) BOO will ascertain weight of Dog on weighing machine.</p> <p>(iii) BOO will confirm the colour during visual inspection.</p>
<p>d. Age- Maximum up to 02 yrs</p>	<p>d. BOO will check the birth certificate, dentation of animal and other age mile-stones.</p>
<p>e. Working traits-</p> <p>(i) Confident, exhibiting neither shyness nor aggressiveness in new situations. The dog may be reserved with strangers but is affectionate with his own people. He is naturally protective of his owner's person and property without being overly aggressive.</p> <p>(ii) The Belgian Malinois possesses a strong desire to work and is quick and responsive to commands from his owner</p> <p>(iii) Outgoing tractable nature, intelligent and adaptable, non aggressive towards humans and other animals and non shy.</p> <p>(iv) Dogs from open source must be at least IGP level I (Schutzhund) qualified.</p> <p>(v) If the Dog is from uniform forces of foreign friendly country then they should be at least 90 % or above in K9 assessment test.</p>	<p>Behavioural traits will be ascertained by BOO during interaction with animal</p>

<p>(vi) The male should have fathered at least one good quality litter and the female must have whelped high quality pups at least once.</p>	<p>(iv) BOO will check IPO /IGP/ NVBK /KNPV/ Schutzhund certification etc.</p> <p>(v)BOO will ascertain certification.</p> <p>(vi) BOO will check breeding record of the dog and also see the quality of pups born.</p>
<p>f. Faults-Any deviation from these specifications is a fault. In determining whether a fault is minor, serious, or major, these two factors should be used as a guide: (a) The extent to which it deviates from the standard (b) The extent to which such deviation would actually affect the working ability and welfare of the dog.</p>	<p>f. BOO will examine the dog visually, Physically, Medically and other documentary evidence/Medical records to ascertain there is no fault.</p>
<p>g. Veterinary Examination- The dog should be Veterinarily sound.</p>	<p>g. Tech officer of BOO will ascertain soundness.</p>

04. WORKING LINE DUTCH SHEPHERD-

QR	TD
<p>a. General appearance-: Medium-sized, middle weighted, well-muscled dog of powerful and well-balanced structure. His carriage is natural and relaxed, but alert. He is a dog with lots of endurance, a lively temperament and an intelligent expression. It has three coat types, short-, long- and rough-haired.</p>	<p>a. It will be ascertained by BOO during visual inspection.</p>
<p>b. Distinguishing characters-: Eyes are dark colored and medium size, set slightly oblique, almond shaped and not protruding. Ears are medium sized, stiff, and erect. The bridge of the muzzle is straight and parallel to the top of the skull. Nose is black without spots or discolored areas.</p>	<p>b. BOO will confirm it during visual inspection.</p>
<p>c. Height, Weight and Colour-:</p> <p>(i) Height- Male- 21-25 Inches Female- 20-24 Inches</p>	<p>(i) Height will be measured by inch tape from ground to ridge of pectoral girdles (wither). Any variance of half inch positive or negative is acceptable however any variance above one inch is not acceptable.</p>

<p>(ii) Weight- Male & Female- 23-35 kg</p> <p>(iii) Colour- Brindle. The base color is golden or silver.</p>	<p>(ii) BOO will ascertain weight of Dog on weighing machine.</p> <p>(iii) BOO will confirm the colour during visual inspection.</p>
<p>d. Age- Maximum up to 02 yrs</p>	<p>d. BOO will check the birth certificate, dentation of animal and other age mile-stones.</p>
<p>e. Working traits-</p> <p>(i) Active, independent, with persistence, intelligence, prepared to be obedient, and gifted with the true shepherding temperament.</p> <p>(ii) He should not show fear or shyness nor viciousness by unwarranted or unprovoked attack.</p> <p>(iii) Outgoing tractable nature, intelligent and adaptable, non aggressive towards humans and other animals and non shy.</p> <p>(iv) Dogs from open source must be at least IGP level I (Schutzhund) qualified.</p> <p>(v) If the Dog is from uniform forces of foreign friendly country then they should be at least 90 % or above in K9 assessment test.</p> <p>(vi) The male should have fathered at least one good quality litter and the female must have whelped high quality pups at least once.</p>	<p>Behavioural traits will be ascertained by BOO during interaction with animal.</p> <p>(iv) BOO will check IPO /IGP/ NVBK/KNPV/ Schutzhund certification etc.</p> <p>(v) BOO will ascertain certification.</p> <p>(vi) BOO will check breeding record of the dog and also see the quality of pups born.</p>
<p>f. Faults-Any deviation from these specifications is a fault. In determining whether a fault is minor, serious, or major, these two factors should be used as a guide: (a) The extent to which it deviates from the standard (b) The extent to which such deviation would actually affect the working ability and welfare of the dog.</p>	<p>f. BOO will examine the dog visually, Physically, Medically and other documentary evidence/Medical records to ascertain there is no fault.</p>
<p>g. Veterinary Examination- The dog should be Veterinarily sound.</p>	<p>g. Tech officer of BOO will ascertain soundness.</p>

05. WORKING LINE DOBERMAN PINSCHER

QR	TD
<p>a. General appearance-: Lean bodied with slender athletic limbs, medium size with a body that is a square.</p>	<p>a. It will be ascertained by BOO during visual inspection.</p>
<p>b. Distinguishing characters-: Head must be long and dry, resembling a blunt wedge in both frontal and profile views. When seen from the front, the head widens gradually toward the base of the ears in a practically unbroken line. Eyes almond shaped, moderately deep set, with vigorous, energetic expression. Iris, of uniform color, ranging from medium to darkest brown in black dogs; in reds, blues, and fawns the color of the iris blends with that of the markings. Ears carried erect. The upper attachment of the ear, when held erect, is on a level with the top of the skull. Top of skull flat, turning with slight stop to bridge of muzzle, with muzzle line extending parallel to top line of skull. Nose solid black on black dogs, dark brown on red ones, dark gray on blue ones, dark tan on fawns. Shoulder Blade-sloping forward and downward at a 45 degrees angle to the ground meets the upper arm at an angle of 90 degrees. Colour Invisible gray, undercoat, black, red, blue and fawn (Isabella). Markings-Rust, sharply defined, appearing above each eye and on muzzle, throat and forechest, on all legs and feet, and below tail.</p>	<p>b. BOO will confirm it during visual inspection.</p>
<p>c. Height, Weight and Colour-:</p> <p>(i) Height Male- 25-28 Inches Female- 23-26 Inches</p>	<p>(i) Height will be measured by inch tape from ground to ridge of pectoral girdles (wither). Any variance of half inch positive or negative is acceptable however any variance above one inch is not acceptable.</p>

<p>(ii) Weight- Male & Female- 25-35 kg</p> <p>(iii) Colour- Invisible gray undercoat, black, red, blue and fawn (Isabella).</p>	<p>(ii) BOO will ascertain weight of Dog on weighing machine.</p> <p>(iii) BOO will confirm the colour during visual inspection.</p>
<p>d. Age- Maximum up to 02 yrs</p>	<p>d. BOO will check the birth certificate, dentation of animal and other age mile-stones.</p>
<p>e. Working traits-</p> <p>(i) Outgoing tractable nature, intelligent and adaptable, non aggressive towards humans and other animals and non shy.</p> <p>(ii) Dogs from open source must be at least IGP level I (Schutzhund) qualified.</p> <p>(iii) If the Dog is from uniform forces of foreign friendly country then they should be at least 90 % or above in K9 assessment test.</p> <p>(iv) The male should have fathered at least one good quality litter and the female must have whelped high quality pups at least once.</p>	<p>(i) Behavioural traits will be ascertain by BOO during interaction with animal.</p> <p>(ii) BOO will check IPO /IGP/ NVBK /KNPV/ Schutzhund certification etc.</p> <p>(iii) BOO will ascertain certification.</p> <p>(iv) BOO will check breeding record of the dog and also see the quality of pups born.</p>
<p>f. Faults-Any deviation from these specifications is a fault. In determining whether a fault is minor, serious, or major, these two factors should be used as a guide: (a) The extent to which it deviates from the standard (b) The extent to which such deviation would actually affect the working ability and welfare of the dog.</p>	<p>f. BOO will examine the dog visually, Physically, Medically and other documentary evidence/Medical records to ascertain there is no fault.</p>
<p>g. Veterinary Examination- The dog should be Veterinarily sound.</p>	<p>g. Tech officer of BOO will ascertain soundness.</p>

06. WORKING LINE COCKER SPANIEL

QR	TD
<p>a. General appearance-: Sturdy, compact body and a cleanly chiseled and refined head, with the overall dog in complete balance and of ideal size. Top line sloping slightly, moderately bent, muscular quarters.</p>	<p>a. It will be ascertained by BOO during visual inspection.</p>
<p>b. Distinguishing characters-: Shape of the eye rims gives a slightly almond shaped appearance. Eyes are not weak or goggled. Iris is dark brown and in general the darker the better. Ears are floppy, long, pendulous, set low, lying close to the head, leather fine, extending to the nose, well covered with long, silky, straight or slightly wavy hair.</p>	<p>b. BOO will confirm it during visual inspection.</p>
<p>c. Height, Weight and Colour-:</p> <p>(i) Height- Male- 14-17 Inches Female- 13-16 Inches</p> <p>(ii) Weight- Male- 13-16 kg Female- 12-15 kg</p> <p>(iii) Colour- Solid colors are black, liver or shades of red, white appearing in combination with black, liver or shades of red.</p>	<p>(i) Height will be measured by inch tape from ground to ridge of pectoral girdles (wither). Any variance of half inch positive or negative is acceptable however any variance above one inch is not acceptable.</p> <p>(ii) BOO will ascertain weight of Dog on weighing machine.</p> <p>(iii) BOO will confirm the colour during visual inspection.</p>
<p>d. Age- Maximum up to 02 yrs</p>	<p>d. BOO will check the birth certificate, dentation of animal and other age mile-stones.</p>
<p>e. Working traits-</p> <p>(i) Outgoing tractable nature, intelligent and adaptable, non aggressive towards humans and other animals and non shy.</p> <p>(ii) Dogs from open source must be at least IGP level I (Schutzhund) qualified.</p>	<p>(i) Behavioural traits will be ascertained by BOO during interaction with animal.</p> <p>(ii) BOO will check IPO /IGP/ NVBK /KNPV/ Schutzhund certification etc.</p>

<p>(iii) If the Dog is from uniform forces of foreign friendly country then they should be at least 90 % or above in K9 assessment test.</p> <p>(iv) The male should have fathered at least one good quality litter and the female must have whelped high quality pups at least once.</p>	<p>(iii) BOO will ascertain certification.</p> <p>(iv) BOO will check breeding record of the dog and also see the quality of pups born.</p>
<p>f. Faults-Any deviation from these specifications is a fault. In determining whether a fault is minor, serious, or major, these two factors should be used as a guide: (a) The extent to which it deviates from the standard (b) The extent to which such deviation would actually affect the working ability and welfare of the dog.</p>	<p>f. BOO will examine the dog visually, Physically, Medically and other documentary evidence/Medical records to ascertain there is no fault.</p>
<p>g. Veterinary Examination- The dog should be Veterinarily sound.</p>	<p>g. Tech officer of BOO will ascertain soundness.</p>

07. WORKING LINE AFGHAN HOUND

QR	TD
<p>a. General appearance-: Straight front, high carried head, eyes gazing into the distance. Large feet of a somewhat exaggerated bend in the stifle due to profuse trouserings.</p>	<p>a. It will be ascertained by BOO during visual inspection.</p>
<p>b. Distinguishing characters-: The head is surmounted by a long silky topknot. The ears are long, set approximately on level with outer corners of the eyes, the leather of the ear reaching nearly to the end of the dog's nose, and covered with long silky hair. The eyes are almond shaped (almost triangular), never full or bulgy, and are dark in colour. Nose is of good size, black in colour. All four feet of the Afghan Hound are in line with the body, turning either in nor out. The hind feet are broad and of good length; the toes arched, and covered with long thick hair; hindquarters powerful and well muscled, with great length between hip and hock; hocks are well let down; good angulation of both stifle and hock; slightly bowed from hock to crotch.</p>	<p>b. BOO will confirm it during visual inspection.</p>

<p>c. Height, Weight and Colour-:</p> <p>(i) Height- Male- 25-27 Inches Female- 24-27 Inches</p> <p>(ii) Weight- Male & Female- 22-27 kg</p> <p>(iii) Colour- All colours are permissible.</p>	<p>(i) Height will be measured by inch tape from ground to ridge of pectoral girdles (wither). Any variance of half inch positive or negative is acceptable however any variance above one inch is not acceptable.</p> <p>(ii) BOO will ascertain weight of Dog on weighing machine.</p> <p>(iii) BOO will confirm the colour during visual inspection.</p>
<p>d. Age- Maximum up to 02 yrs</p>	<p>d. BOO will check the birth certificate and dentation of animal and other age milestones.</p>
<p>e. Working traits-</p> <p>(i) Aloof, dignified, yet gay, intelligent and adaptable, non aggressive towards humans and other animals and non shy.</p> <p>(ii) Dogs from open source must be at least IGP level I (Schutzhund) qualified.</p> <p>(iii) If the Dog is from uniform forces of foreign friendly country then they should be at least 90 % or above in K9 assessment test.</p> <p>(iv) The male should have fathered at least one good quality litter and the female must have whelped high quality pups at least once.</p>	<p>(i) Behavioural traits will be ascertain by BOO during interaction with animal.</p> <p>(ii) BOO will check IPO /IGP/ NVBK /KNPV/ Schutzhund certification etc.</p> <p>(iii) BOO will ascertain certification.</p> <p>(iv) BOO will check breeding record of the dog and also see the quality of pups born.</p>
<p>f. Faults-Any deviation from these specifications is a fault. In determining whether a fault is minor, serious, or major, these two factors should be used as a guide: (a) The extent to which it deviates from the standard (b) The extent to which such deviation would actually affect the working ability and welfare of the dog.</p>	<p>f. BOO will examine the dog visually, Physically, Medically and other documentary evidence/Medical records to ascertain there is no fault.</p>
<p>g Veterinary Examination- The dog should be Veterinarily sound.</p>	<p>g. Tech officer of BOO will ascertain soundness.</p>

08. WORKING LINE SPRINGER SPANIEL

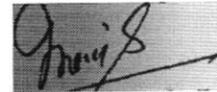

QR	TD
<p>a. General appearance-: Symmetrically built, compact, strong, merry, active. Highest on leg and raciest in build of all Spaniels.</p>	<p>a. It will be ascertained by BOO during visual inspection.</p>
<p>b. Distinguishing characters-: Skull: Of medium length, fairly broad, slightly rounded, rising from forehead, making a brow or stop, divided by fluting between eyes, dying away along forehead towards occipital bone which should not be prominent. Eyes: Medium size, almond-shaped, not prominent nor sunken, well set in (not showing haw), alert, kind expression. Dark hazel. Light eyes undesirable. Ears: Lobular, good length and width, fairly close to head, set in line with eye. Nicely feathered.</p>	<p>b. BOO will confirm it during visual inspection.</p>
<p>c. Height, Weight and Colour-:</p> <p>(i) Height- Male- 14-20 Inches Female- 13-19 Inches</p> <p>(ii) Weight- Male- 13-18 kg Female- 12-17 kg</p> <p>(iii) Colour: Liver and white, black and white, or either of these colours with tan markings</p>	<p>(i) Height will be measured by inch tape from ground to ridge of pectoral girdles (wither).
