

TRIAL DIRECTIVE OF PRE-OWNED HIGH END VEHS FOR TAC DRIVING COURSE : CATEGORY-I

Ser No	General Description	Parameters	Specifications	Procedure suggested for trial	Result expected / desired	Complied / Not complied
1	Engine & Transmission	Engine Capacity (cc)	2300 to 2700	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Fuel Type	Petrol/ Diesel	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Mileage	09 to 12 Kms	To be checked as per user manual & physically while driving the veh	The veh should comply with the recommended specifications	
		No of cylinders in engine	4	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Veh transmission sys	Manual	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		No of speed forwards gear	5	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Type of wheel drive	2 WD front/rear	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		drive axle	Front/Rear	To be checked as per user manual & physically while driving the veh	The veh should comply with the recommended specifications	
		Engine BHP	90 to 110 BHP @ 3600 RPM	To be checked as per user manual & physically while driving the veh	The veh should comply with the recommended specifications	
		Engine torque	200 NM @ 1400 RPM to 3400 RPM	To be checked as per user manual & physically while driving the veh	The veh should comply with the recommended specifications	
Engine cooling Sys	Water Cooling	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications			

Ser No	General Description	Parameters	Specifications	Procedure suggested for trial	Result expected / desired	Complied / Not complied
2	Dimension of veh	Width	1800 to 1900 mm	To be checked physically & manually by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Length	4650 to 4750 mm	To be checked physically & manually by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Height	1750 to 1850 mm	To be checked physically & manually by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Wheel Base	2700 to 2800 mm	To be checked physically & manually by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
3	Veh Weight	Gross weight	2250 to 2350 Kgs	To be checked as per user manual by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Kerb weight	1600 to 1700 Kgs	To be checked as per user manual by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
4	Ground Clearance	170 to 185 mm		To be checked as per user manual & physically by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
5	Capacity	Seating Capacity	05 to 07	To be checked physically by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Doors	5	To be checked physically by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		No of Seating row	02 to 03	To be checked physically by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Fuel Tank	45 to 60 Ltrs	To be checked as per user manual by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
6	Suspensions, Brakes, Steering & Tyres	Brake type ABS	With/ Without	To be checked as per user manual / tech specifications & counter checking physically by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	

Ser No	General Description	Parameters	Specifications	Procedure suggested for trial	Result expected / desired	Complied / Not complied
		Front Brake	Disc	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Rear Brake	Drum	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Type of Steering	Power	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Type of tyre	Radial (5mm to 6 mm depth left)	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Turning Radius	5400 mm	To be checked as per user manual / tech specifications& counter checking physically by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Size of tyre	215/55 R17	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Type of wheel	Simple	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
7	Load Carrying Capacity (Kgs)		550 to 610 Kgs	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
8	Electric system	Bty Condition	Good	Lead test to be carried out and the bty is also reqd to be checked using Bty tester by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Air Condition	With/ Without	To be checked physically by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Battery (Availability)	Multiple OEMs	To be checked physically by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Central locking	Yes	To be checked physically by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Low Fuel warring	Yes	To be checked physically by the BOO alongwith the URO	The veh should comply with the recommended	

Ser No	General Description	Parameters	Specifications	Procedure suggested for trial	Result expected / desired	Complied / Not complied
9	Pollution	Vehicle emission compliance	Bharat Stage-IV and above	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Air intake system	Turbocharged	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
10	Speed (Sustained for minimum 30 minutes continuously)	On Road	Minimum 80 Kilometers per hour with full load	To be checked as per user manual / tech specifications& counter checking physically by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		X-Country	Minimum 50 Kilometers per hour with full load	To be checked as per user manual / tech specifications& counter checking physically by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Acceleration	0-100 Kilometers per hour in 15 Seconds	To be checked as per user manual / tech specifications& counter checking physically by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
11	Operating Temperature		-20° to +55° Celsius	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
12	Internal Fitments	Provision for fitting radio communication sets or Very High Frequency and High Frequency Radio sets	Yes	To be checked physically by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		First Aid Box	Yes	To be checked physically by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Co-Dvr air bag	With/ Without	To be checked physically by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Side Air bag	With/ Without	To be checked physically by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	

Ser No	General Description	Parameters	Specifications	Procedure suggested for trial	Result expected / desired	Complied / Not complied
		Rear Seat Belt	Yes	To be checked physically by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Rear view camera to be provided for the Driver	Yes	To be checked physically by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Day night view mirror	Yes	To be checked physically by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Dvr Air Bag	Yes	To be checked physically by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
13	External Fitments	Vehicle colour type	Metallic/ Solid	To be checked physically by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Provision for Centralized Air Filling System for tyres	With/ Without	To be checked physically by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Provision for self-recovery winch for recovering the vehicle	With/ Without	To be checked physically by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
14	Miscellaneous Points.	Colour of vehicle	White/ Black/Silver	To be checked physically by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Vehs mileage upto 70,000 Kms and not older than 6 yrs to be considered		To be checked physicallyby the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
15	Maintenance Characteristics	The accessories/fitments/spares and technical expertise of automobile should be easily available in the market		To be checked by survey in local market by BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Provision of easy replacement of the engine and transmission system to facilitate its easy repair and refitting		To be checked by survey in local market by BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		The supplier will provide a warranty for 1,50,000 Kilometers or three years, which ever is earlier from dt of purchase as per Motor Veh Repair Act 2013 (Pre-owned vehs upto 1,50,000		To be checked physicallyby the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Vehicle training/maintenance should be simple and easy		To be checked physicallyby the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		User Manual, Complete literature, illustrated diagrams, list of spares, Veh Kit List (VKL) etc and operating instructions for the training maintenance of the vehicle and accessories should		To be checked physicallyby the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		All report for the materials used be provided by the firms from accredited labs		To be checked physicallyby the BOO alongwith the URO Team	The veh should comply with the recommended specifications	

TRIAL DIRECTIVE OF PRE-OWNED HIGH END VEHS FOR TAC DRIVING COURSE : CATEGORY-II

Ser No	General Description	Parameters	Specifications	Procedure suggested for trial	Result expected / desired	Complied / Not complied
1	Engine & Transmission	Engine Capacity (cc)	1450 to 2000	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Fuel Type	Petrol/ Diesel	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Mileage	15 to 22 Kms	To be checked as per user manual & physically while driving the veh	The veh should comply with the recommended specifications	
		No of cylinders in engine	4	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Veh transmission sys	Manual	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		No of speed forwards gear	5	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Type of wheel drive	2 WD front/rear	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		drive axle	Front/Rear	To be checked as per user manual & physically while driving the veh	The veh should comply with the recommended specifications	
		Engine BHP	90 to 110 BHP @ 6000 RPM	To be checked as per user manual & physically while driving the veh	The veh should comply with the recommended specifications	
		Engine torque	120 to 140 NM @ 4400 RPM	To be checked as per user manual & physically while driving the veh	The veh should comply with the recommended specifications	
Engine cooling Sys	Air/Water Cooling	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications			

Ser No	General Description	Parameters	Specifications	Procedure suggested for trial	Result expected / desired	Complied / Not complied
2	Dimension of veh	Width	1700 to 1800 mm	To be checked physically & manually by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Length	4350 to 4550 mm	To be checked physically & manually by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Height	1450 to 1600 mm	To be checked physically & manually by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Wheel Base	2600 to 2750 mm	To be checked physically & manually by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
3	Veh Weight	Gross weight	1400 to 1500 Kgs	To be checked as per user manual by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Kerb weight	1000 to 1100 Kgs	To be checked as per user manual by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
4	Ground Clearance	165 to 180 mm		To be checked as per user manual & physically by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
5	Capacity	Seating Capacity	05 to 07	To be checked physically by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Doors	4	To be checked physically by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		No of Seating row	02 to 03	To be checked physically by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Fuel Tank	40 to 50 Ltrs	To be checked as per user manual by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
6	Suspensions, Brakes, Steering & Tyres	Brake type ABS	With/ Without	To be checked as per user manual / tech specifications & counter checking physically by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Front Brake	Disc	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	

Ser No	General Description	Parameters	Specifications	Procedure suggested for trial	Result expected / desired	Complied / Not complied
		Rear Brake	Drum	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Type of Steering	Power Assisted (Electric)	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Type of tyre	Radial (5mm to 6 mm depth left)	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Turning Radius	5400 to 5600 mm	To be checked as per user manual / tech specifications & counter checking physically by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Size of tyre	195/55 R16	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Type of wheel	Simple	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
7	Load Carrying Capacity (Kgs)		550 to 610 Kgs	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
8	Electric system	Bty Condition	Good	Lead test to be carried out and the bty is also reqd to be checked using Bty tester by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Air Condition	With/ Without	To be checked physically by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Battery (Availability)	Multiple OEMs	To be checked physically by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Central locking	Yes	To be checked physically by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Low Fuel warring	Yes	To be checked physically by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	

Ser No	General Description	Parameters	Specifications	Procedure suggested for trial	Result expected / desired	Complied / Not complied
9	Pollution	Vehicle emission compliance	Bharat Stage-IV and above	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Air intake system	Natural	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
10	Speed (Sustained for minimum 30 minutes continuously)	On Road	Minimum 80 Kilometers per hour with full load	To be checked as per user manual / tech specifications & counter checking physically by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		X-Country	Minimum 50 Kilometers per hour with full load	To be checked as per user manual / tech specifications & counter checking physically by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Acceleration	0-100 Kilometers per hour in 15 Seconds	To be checked as per user manual / tech specifications & counter checking physically by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
11	Operating Temperature		-20° to +55° Celsius	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications

TRIAL DIRECTIVE OF PRE-OWNED HIGH END VEHS FOR TAC DRIVING COURSE : CATEGORY-III

Ser No	General Description	Parameters	Specifications	Procedure suggested for trial	Result expected / desired	Complied / Not complied
1	Engine & Transmission	Engine Capacity (cc)	1100 to 1449	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Fuel Type	Petrol/ Diesel	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Mileage	17-24 Kms	To be checked as per user manual & physically while driving the veh	The veh should comply with the recommended specifications	
		No of cylinders in engine	4	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Veh transmission sys	Manual	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		No of speed forwards gear	5	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Type of wheel drive	2 WD front/rear	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		drive axle	Front/Rear	To be checked as per user manual & physically while driving the veh	The veh should comply with the recommended specifications	
		Engine BHP	80 to 110 BHP @ 6000 RPM	To be checked as per user manual & physically while driving the veh	The veh should comply with the recommended specifications	
		Engine torque	130 to 140 NM @ 4400 RPM	To be checked as per user manual & physically while driving the veh	The veh should comply with the recommended specifications	
Engine cooling Sys	Water Cooling	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications			

Ser No	General Description	Parameters	Specifications	Procedure suggested for trial	Result expected / desired	Complied / Not complied
2	Dimension of veh	Width	1700 to 1800 mm	To be checked physically & manually by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Length	3950 to 4050 mm	To be checked physically & manually by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Height	1500 to 1600 mm	To be checked physically & manually by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Wheel Base	2400 to 2500 mm	To be checked physically & manually by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
3	Veh Weight	Gross weight	1335 to 1730 Kgs	To be checked as per user manual by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Kerb weight	880 to 1016 Kgs	To be checked as per user manual by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
4	Ground Clearance	160 to 175 mm		To be checked as per user manual & physically by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
5	Capacity	Seating Capacity	05 to 07	To be checked physically by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Doors	4	To be checked physically by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		No of Seating row	02 to 03	To be checked physically by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Fuel Tank	40 to 50 Ltrs	To be checked as per user manual by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	

Ser No	General Description	Parameters	Specifications	Procedure suggested for trial	Result expected / desired	Complied / Not complied
6	Suspensions, Brakes, Steering & Tyres	Brake type ABS	With/ Without	To be checked as per user manual / tech specifications & counter checking physically by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Front Brake	Disc	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Rear Brake	Drum	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Type of Steering	Power	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Type of tyre	Tubeless Radial	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Turning Radius	4800 to 5200 mm	To be checked as per user manual / tech specifications & counter checking physically by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Size of tyre	165/80 R14 to 185/65 R15	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Type of wheel	Simple	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
7	Load Carrying Capacity (Kgs)		450 to 585 Kgs	To be checked as per user manual / tech specifications by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	

Ser No	General Description	Parameters	Specifications	Procedure suggested for trial	Result expected / desired	Complied / Not complied
8	Electric system	Bty Condition	Good	Lead test to be carried out and the bty is also reqd to be checked using Bty tester by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Air Condition	With	To be checked physically by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Battery (Availability)	Multiple OEMs	To be checked physically by the BOO alongwith the URO Team	The veh should comply with the recommended specifications	
		Central locking	Yes	To be checked physically by the BOO alongwith the URO Team	The veh should comply with the recommended specifications
